Projects

1. [E-Commerce Website](#)

A perfectly personalized website for you to purchase the product you are fond of.

2. [Google AI \(Virtual Assistant\)](#)

An AI website for user interaction

3. [Dice Roll Game](#)

An interesting game in which you have to reach a score of 50 faster by playing Dice & you will be the Winner.

4. [Price Tracker Chrome Extension](#)

Extension to keep track of prices of your product on **Amazon** & **Flipkart**

Experience

Full Stack Developer at **SMG Infotech**, Hyderabad
April 2023 – Present

Built [Price Tracker](#) (Chrome Extension)

- Server written with **Express.js** to keep track of current prices of products in extension.

- **Javascript** used for Chrome Extension

- **Browser API** used to send notification and store data coming from server.

- **Rest API** to communicate with server and frontend.

- **HTML, CSS** used for design

Certification

Completed an intensive JavaScript course that covered core concepts, ES6 features, and practical applications, equipping me with the skills to develop real-world based products.
